B. AUTOMATED INDIVIDUAL DECISION-MAKING AND PROFILING

In some circumstances, automated decisions concerning particular data elements may occasionally be made when POINT3 processes network traffic data for the purpose of network and information security, based on our or our customers' legitimate interest as stated, above. This could involve in particular assigning relative cybersecurity reputation scores to IP addresses and URLs based on objective cyber-threat indicators measured by our cyber-threat detection engines. Such indicators may be based on the determination that malicious or otherwise harmful contents are hosted at a given URL, or are emanating from a given IP address. Such automatically-assigned reputation scores may be leveraged by you, by POINT3, by our partners, and by other customers to detect, block, and mitigate the identified cyber-threats. They could therefore result in our products and services blocking network traffic coming from or going to such URLs and IP addresses. No such processing is intended to produce any other effect than protecting you, POINT3, our partners, and our other customers from cyber-threats. Still, should you consider that such automated processing is unduly affecting you in a significant way, please contact POINT3's Data Controller regarding which of our services may be adversely impacting you and to seek our help in finding a satisfactory solution.
